Supervisory Training

WHAT IS STP?

AGC's Supervisory Training Program (STP) is a construction-specific training curriculum developed, updated, and

field-tested by and for contractors. Supervisory skill - or the lack of it - directly affects every company's bottom line. Each day, decisions made by every foreman and superintendent are crucial to the success or failure of every construction project. You make your money in the field, and STP can help you improve your organization's bottom line.

IS STP FOR YOU?

STP Participants are likely to have various titles depending on the kind of work they perform, the geographical location of their projects, and the size

of their company. Individuals attending STP courses include anyone on a construction

jobsite in a supervisory role - from the new supervisor and foreman to the experienced superintendent who are looking to become a more effective manager of people, time, equipment and materials.

COURSE CONTENT

The STP curriculum creates an unmatched learning experience for participants.

ACTIVITY BASED ~ Every STP course is activity-based, with discussions, case histories, problems, and exercises.

ADULT EDUCATION ~ Participants in STP courses draw upon their field experience and learn by interaction with others from all areas of the construction industry.

MANUAL & RESOURCES ~ Participants will receive a Participant's Manual with information on each course and instructor's use an Instructor's Guide, with PowerPoint presentation for each unit.
